“Established in 2014 by the Chancellor’s Committee on Persons with Disabilities, the Lee Henson Access Mizzou Award was created in memory and honor of Lee Henson, MU’s former ADA Coordinator (the position now identified as the Director of Accessibility and ADA Education). Through Lee’s work and service, his dream was to create a campus that was accessible to all, and especially to people with disabilities.

This annual award recognizes members of our MU community who have responded above and beyond to a particular accessibility concern or need; championed universal design to make the University a better place for persons with disabilities and others; and/or demonstrated and modeled a commitment over time to improving the inclusion of persons with disabilities or the accessibility of MU’s campus and programs.”

The nominees for the 2016 awards were evaluated and the committee selected four recipients:
